INDICATION
XHANCE is a prescription medicine used to treat nasal polyps in adults.

IMPORTANT SAFETY INFORMATION
Do not use XHANCE if you are allergic to fluticasone propionate or any of the ingredients in XHANCE.

Please see additional Important Safety Information, and enclosed Instructions for Use and Patient Information.
EXPERIENCE THE DIFFERENCE

XHANCE USES YOUR BREATH TO HELP REACH THE SOURCE OF THE PROBLEM

XHANCE is the only FDA-approved prescription nasal spray that uses an Exhalation Delivery System to treat nasal polyps.

You blow into XHANCE, you don’t sniff. Your breath helps deliver medicine high and deep into your nasal passages, where nasal polyps occur. That means the medicine should reach the source of the problem.

Because you blow using your mouth when you use XHANCE, you may also limit the medicine from dripping down your throat, so more medicine is directed to where it’s needed to help treat your symptoms.

SYMPTOM RELIEF WITHIN REACH

XHANCE is approved for the treatment of nasal polyps in adults. In clinical trials,* XHANCE improved symptoms of nasal polyps, such as nasal congestion, as early as 2 weeks, and symptoms continued to get better over time. In addition, XHANCE significantly reduced the size of nasal polyps over time.

*In 16-week clinical trials.

IMPORTANT SAFETY INFORMATION (continued)

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements. It is very important to tell your healthcare provider if you take antifungal or anti-HIV medicines.
NASAL POLYPS AND THEIR SYMPTOMS

Nasal polyps result from chronic inflammation and occur high and deep within your nasal passages and sinuses. This makes them difficult to see with a routine nasal exam. In fact, you may not even know you have nasal polyps.

The symptoms of nasal polyps last at least 3 months. Because nasal polyps and associated inflammation block passages high and deep in the nose, nasal sprays may have a hard time reaching them. That may be why you’re not getting the relief you need.

SIGNS AND SYMPTOMS OF NASAL POLYPS:

- NASAL CONGESTION
- RUNNY NOSE/POST-NASAL DRIP
- FACIAL PAIN OR PRESSURE
  (USUALLY IN THE NOSE AND SINUS REGION)
- REDUCED SENSE OF SMELL

FOR BEST RESULTS

✓ Use XHANCE consistently; do not discontinue use unless instructed by your doctor
✓ XHANCE should be used twice daily
✓ Remember to refill your prescription monthly

GET STARTED
For full instructions on using XHANCE, please see enclosed FDA-approved Instructions for Use.

COMPONENTS
Nosepiece
Cap
Flexible mouthpiece
Indented grip
Bottle

GRIP
One-handed grip OR Two-handed grip

PRIMING
Before first use
A new XHANCE must be primed. Follow these simple steps.

Remove the cap and shake
Pump 7 times, or until you see a fine mist

You’re now ready to use XHANCE!

→ Note: If you have not used XHANCE for 7 or more days, re-prime by spraying 2 times.

Please see additional Important Safety Information, and enclosed Instructions for Use and Patient Information.
USING XHANCE

1. SEAL
   First, shake. Then place your fingers on the indented grip BELOW the mouthpiece.
   Gently insert the nosepiece into your nose and flexible mouthpiece into your mouth.
   ➤ Keep a tight seal between the nosepiece and your nostril

2. AIM
   Aim the device upward between your eyes.
   ➤ It may help to use a mirror

3. BLOW
   Take a deep breath and blow hard into the mouthpiece. Imagine you are blowing up a balloon.
   ➤ Blow, don't sniff...and don't block other nostril!

4. PRESS
   Keep blowing as you press the bottle with your thumb, releasing the medicine deep into your nasal passages.
   ➤ Keep blowing hard while pressing the bottle

Now repeat these steps for your other nostril

REMEMBER to use XHANCE twice daily
IMPORTANT SAFETY INFORMATION (continued)
XHANCE can cause nasal problems such as nosebleeds, crusting in the nose, sores (ulcers) in the nose, hole in the cartilage of the nose (nasal septal perforation).

XHANCE can cause eye problems including glaucoma and cataracts. You should have regular eye exams when using XHANCE.

Call your healthcare provider right away or get emergency medical care if you get any of these signs of a serious allergic reaction: rash, hives, swelling of your face, mouth, and tongue, breathing problems, and low blood pressure.

XHANCE can weaken your immune system, make you more likely to get infections, and can make certain infections worse. Avoid contact with people who have a contagious disease such as chickenpox or measles while using XHANCE. If you come in contact with someone who has chickenpox or measles, call your healthcare provider right away.

XHANCE can cause reduced production of steroid hormones by your adrenal gland, resulting in tiredness, weakness, nausea and vomiting, and low blood pressure.

XHANCE can weaken bones (osteoporosis).

The most common side effects of XHANCE include nosebleeds, thrush (fungal infection in the nose and throat), sores (ulcers) in the nose, pain or swelling of the nose or throat (nasopharyngitis), redness of the nose, nasal congestion, sinus infection, slow wound healing and headache.

Before using XHANCE, carefully read the FDA-approved Patient Information and Instructions for Use.
